REQUIRED BED BUG PREPARATION CLIENTS RESPONSIBILITY CHECK LIST

All persons will be required to be out of the residence for at least 6 hours during and after the treatment. Pregnant women and asthmatics should be out of the residence for at least 24 hrs. Fish tanks should be covered and the filtration and air supply shut off until you return 6 hours after treatment. Birds, dogs, cats, reptiles, hamsters etc will be required to be out of the residence at least 6 hours as well.

BEFORE your scheduled appointment these necessary steps must be taken otherwise treatment will not be performed.

- All clothing in dressers, closets and in hampers in the room will need to be placed in plastic bags and taped shut.
- All linen closets will need to be emptied and contents placed in garbage bags and taped shut.
- Luggage should be taken out of the closets and placed in the rooms to be treated.
- All Bed side tables, book-shelves and dresser drawers need to be completely emptied and contents placed in plastic bags.
- Generally reduce clutter in the rooms to be treated. Throw out what you no longer need or use. Keep toys, books and papers off the floors.
- All linens must be stripped from the bed and placed in plastic bags and taped shut.
- All bagged bed linens, clothes etc. must then be taken immediately and washed in very hot water (120°F) or dry-cleaned. Do not re-use the same bags to re-bag the clothes once the washing is complete otherwise they may become infested again. Use fresh bags.

The mattresses will be thoroughly vacuumed to remove any loose Bed bugs followed by a steam treatment to kill all life stages including the eggs in cracks and crevices. A residual treatment using an appropriate labeled insecticide is then applied to remaining cracks and crevices. A **follow-up treatment** must be completed in **10-14 days** to kill off any newly hatched Bed bugs. After the follow-up treatment has been completed, you may then return all clothes to closets, dressers etc.

If you have any questions you may call Pest Arrest Pest Control Services for further clarification 705-878-3378 or 705-760-5696.
